

BC Wood

2010 Wood Products Specifiers Book

A Letter from Bill Downing, CEO of BC Wood

In less than four years, Vancouver will take centre stage when it hosts the 2010 Winter Olympic and Paralympic Games. The excitement in BC is already growing. A building boom is sweeping across the province as it prepares to host the international community and one of the most anticipated events in the world.

As an association of the world's finest manufacturers of specialty wood products, BC Wood is at the forefront of efforts to encourage the use of wood in the massive construction and renovation efforts leading up to the games. As part of that effort, we want to partner with the architectural and design community to showcase our wood products. To help foster this partnership, BC Wood has developed a book that highlights the diversity, beauty and quality of wood products from 40 select BC Wood members.

We've designed this book to serve as a source of inspiration, innovation and as an informative guide to the world-class manufacturers we have right here in British Columbia. BC Wood and its members are ready to work with you to demonstrate British Columbia's innovative design and manufacturing expertise to the world in 2010.

A handwritten signature in black ink that reads "Bill Downing". The signature is fluid and cursive, with a large, sweeping flourish at the end.

*Let our design staff work with you
to create the home you have in mind*

Brian Moore
LOG HOMES LTD.

Brian Moore Log Homes builds memorable homes for their customers worldwide. We are a multi-disciplinary product provider of Post & Beam, Timber Frame and Handcrafted Log Homes for residential, recreational, retail and commercial markets.

Brian Moore Log Homes Ltd. - Profile

President and manager Brian Moore has been building log homes since 1979 and has been exporting log homes internationally since 1990. With a staff that is dedicated to the trade and is passionate about their work, Brian Moore Log Homes delivers in producing top quality log and timber homes.

We are located in British Columbia, Canada one minute away from the US border and an hour from the Port of Vancouver for fast delivery. We ship to the US, Europe and Japan.

Builders and dealers come to us to help them build memorable homes for their customers. We lend our marketing and building knowledge with the ultimate goal of improving your business.

For individual homebuyers, if it's made of log or timber we can build it for you. If you have a plan in mind, bring it to us or let our design staff work with you to create the home you have in mind. Building a home can be at the best of times, overwhelming. Let Brian Moore Log Homes take the pressure off. If you live in Canada or the United States, we will help you qualify local contractors, and consult with them to ensure your project is completed to the highest of standards.

There are a lot of alternatives to choose from when incorporating wood into your project. Sometimes we combine styles (timber frame, hand crafted logs, post and beams) or use just one system such as timber framing. We can also help create hybrid looks that use wood with concrete and metal to give a project a more minimalist and urban appeal. Brian Moore Log Homes uses all types of notches and handcrafted styles in our log homes as well as custom carvings if desired.

We recommend Western Red Cedar or Douglas Fir that is harvested using sustainable methods.
